Datasheet for ABIN710666 anti-NFKB1 antibody (pSer893)

4 Images

Overview

Quantity:	100 µL
Target:	NFKB1
Binding Specificity:	pSer893
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This NFKB1 antibody is un-conjugated
Application:	ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Flow Cytometry (FACS), Immunohistochemistry (Frozen Sections) (IHC (fro))

Product Details

Immunogen:	KLH conjugated synthetic phosphopeptide derived from human NF KappaB p105 around the phosphorylation site of Ser893
Isotype:	lgG
Cross-Reactivity:	Human, Mouse
Predicted Reactivity:	Cow,Horse,Rabbit
Purification:	Purified by Protein A.
Target Details	

Target:

NFKB1

Target Details	
Alternative Name:	NFKB1 (NFKB1 Products)
Background:	Synonyms: p50, KBF1, p105, EBP-1, NF-kB1, NFKB-p50, NFkappaB, NF-kappaB, NFKB-p105, NF-
	kappa-B, Nuclear factor NF-kappa-B p105 subunit, DNA-binding factor KBF1, Nuclear factor of
	kappa light polypeptide gene enhancer in B-cells 1, NFKB1
	Background: NF-kappa-B is a pleiotropic transcription factor present in almost all cell types and
	is the endpoint of a series of signal transduction events that are initiated by a vast array of
	stimuli related to many biological processes such as inflammation, immunity, differentiation,
	cell growth, tumorigenesis and apoptosis. NF-kappa-B is a homo- or heterodimeric complex
	formed by the Rel-like domain-containing proteins RELA/p65, RELB, NFKB1/p105, NFKB1/p50,
	REL and NFKB2/p52 and the heterodimeric p65-p50 complex appears to be most abundant
	one. The dimers bind at kappa-B sites in the DNA of their target genes and the individual dimers
	have distinct preferences for different kappa-B sites that they can bind with distinguishable
	affinity and specificity. Different dimer combinations act as transcriptional activators or
	repressors, respectively. NF-kappa-B is controlled by various mechanisms of post-translational
	modification and subcellular compartmentalization as well as by interactions with other
	cofactors or corepressors. NF-kappa-B complexes are held in the cytoplasm in an inactive state
	complexed with members of the NF-kappa-B inhibitor (I-kappa-B) family. In a conventional
	activation pathway, I-kappa-B is phosphorylated by I-kappa-B kinases (IKKs) in response to
	different activators, subsequently degraded thus liberating the active NF-kappa-B complex
	which translocates to the nucleus. NF-kappa-B heterodimeric p65-p50 and RelB-p50 complexes
	are transcriptional activators. The NF-kappa-B p50-p50 homodimer is a transcriptional
	repressor, but can act as a transcriptional activator when associated with BCL3. NFKB1
	appears to have dual functions such as cytoplasmic retention of attached NF-kappa-B proteins
	by p105 and generation of p50 by a cotranslational processing. The proteasome-mediated
	process ensures the production of both p50 and p105 and preserves their independent
	function, although processing of NFKB1/p105 also appears to occur post-translationally.
Gene ID:	4790
UniProt:	P19838
Pathways:	p53 Signaling, NF-kappaB Signaling, RTK Signaling, TCR Signaling, TLR Signaling, Fc-epsilon
	Receptor Signaling Pathway, Neurotrophin Signaling Pathway, Activation of Innate immune
	Response, Myometrial Relaxation and Contraction, Regulation of Carbohydrate Metabolic
	Process, Hepatitis C, Toll-Like Receptors Cascades, BCR Signaling, S100 Proteins

Application Details

Application Notes:	ELISA 1:500-1000
	FCM 1:20-100
	IHC-P 1:200-400
	IHC-F 1:100-500
	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	0.01M TBS(pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.
Expiry Date:	12 months
