

## Datasheet for ABIN711335 anti-PTPN7 antibody (pSer246) (HRP)

## Overview

Quantity:	100 μL
Target:	PTPN7
Binding Specificity:	pSer246
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This PTPN7 antibody is conjugated to HRP
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)),
	Immunohistochemistry (Frozen Sections) (IHC (fro))
Product Details	
Immunogen:	KLH conjugated synthetic phosphopeptide derived from mouse PTPN7 around the
	phosphorylation site of Ser246
Isotype:	IgG
Cross-Reactivity:	Mouse
Predicted Reactivity:	Rat
Purification:	Purified by Protein A.
Target Details	
Target:	PTPN7

## Target Details

Alternative Name:	PTPN7 (PTPN7 Products)
Background:	Synonyms: PTPN7phospho S246, BPTP 4, BPTP4, Dual specicity phosphatase 1,
	Hematopoietic protein tyrosine phosphatase, LC PTP, LCPTP, LPTP, Protein tyrosine
	phoshatase non receptor type stress induced, Protein tyrosine phoshatase nonreceptor type
	stress induced, Protein tyrosine phosphatase LC PTP, Protein tyrosine phosphatase non
	receptor type 7, PTPN 7, PTPNI, Tyrosine protein phosphatase non receptor type 7, PTN7_HUMAN.
	Background: The protein encoded by this gene is a member of the protein tyrosine phosphatase
	(PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular
	processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation.
	This gene is preferentially expressed in a variety of hematopoietic cells, and is an early
	response gene in lymphokine stimulated cells. The non-catalytic N-terminus of this PTP can
	interact with MAP kinases and suppress the MAP kinase activities. This PTP was shown to be
	involved in the regulation of T cell antigen receptor (TCR) signaling, which was thought to
	function through dephosphorylating the molecules related to MAP kinase pathway. Multiple
	alternatively spliced transcript variants have been found for this gene. [provided by RefSeq].
	atternatively spiloed transcript variation have been found for this gene. [provided by Neroeq].
Gene ID:	5778
	5778
Application Details	5778 WB 1:300-5000

## Handling

Handling Advice:	Do NOT add Sodium Azide! Use of Sodium Azide will inhibit enzyme activity of horseradish peroxidase.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
