## STAMBP Protein (AA 1-424) (His tag)

### 1 Image

#### Overview

|                               |                                               |
|-------------------------------|-----------------------------------------------|
| Quantity:                     | 50 µg                                         |
| Target:                       | STAMBP                                        |
| Protein Characteristics:      | AA 1-424                                      |
| Origin:                       | Human                                         |
| Source:                       | Escherichia coli (E. coli)                    |
| Protein Type:                 | Recombinant                                   |
| Purification tag / Conjugate: | This STAMBP protein is labelled with His tag. |
| Application:                  | Western Blotting (WB), ELISA                  |

#### Product Details

|            |                                             |
|------------|---------------------------------------------|
| Purity:    | Greater than 95 % as determined by SDS-PAGE |
| Sterility: | 0.2 µm filtered                             |

#### Target Details

|                   |                                                                                                                                                                                                                                              |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | STAMBP                                                                                                                                                                                                                                       |
| Alternative Name: | AMSH ( <a href="#">STAMBP Products</a> )                                                                                                                                                                                                     |
| Background:       | AMSH, Associated molecule with the SH3 domain of STAM, Endosome associated ubiquitin isopeptidase, Endosome-associated ubiquitin isopeptidase, MGC126516, MGC126518, MICCAP, STABP_HUMAN, STAM binding protein, STAM-binding protein, Stambp |
| Molecular Weight: | 46.5 kDa                                                                                                                                                                                                                                     |

## Target Details

---

UniProt: [O95630](#)

## Application Details

---

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Reconstitution: Centrifuge the vial at 10,000 rpm for 1 minute, reconstitute at 200 µg/mL in sterile distilled water by gentle pipetting 2-3 times, don't vortex

Buffer: Lyophilized from a 0.2 µm filtered solution in 10 mM Hepes, 500 mM NaCl with 5 % trehalose, pH 7.4

Storage: 4 °C, -20 °C

Storage Comment: -20°C for 12 months as lyophilized, 2-8°C for 1 month under sterile conditions after reconstitution

Expiry Date: 12 months
