| | receive a correctly folded protein. |
|------------------------------|--|
| | The concentration of our recombinant proteins is measured using the absorbance at 280nm. |
| | The protein's absorbance will be measured in several dilutions and is measured against its |
| | specific reference buffer. The concentration of the protein is calculated using its specific |
| | absorption coefficient. We use the Expasy's protparam tool to determine the absorption |
| | coefficient of each protein. |
| Purification: | Three step purification of proteins expressed in baculovirus infected SF9 insect cells: |
| | 1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with |
| | different detergents (detergent screen). Samples are analyzed by Western blot. |
| | 2. The best performing detergent is used for solubilization and the proteins are purified via their rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate |
| | fractions are analyzed by Western blot. |
| | 3. Protein containing fractions of the best purification are subjected to second purification step |
| | through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and |
| | Western blot. |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Sterility: | 0.22 µm filtered |
| Endotoxin Level: | Endotoxins have not been removed. Please contact us if you require an endotoxin-free version |
| | of this product. |
| Grade: | Crystallography grade |
| Biological Activity Comment: | Protein has not been tested for activity yet. |

Target Details

| Target: | S100A1 |
|-------------------|---|
| Alternative Name: | Protein S100 (S100 calcium-binding protein) (S100A1 Products) |
| Background: | May function as calcium sensor and modulator, contributing to cellular calcium signaling. May |
| | function by interacting with other proteins, such as TPR-containing proteins, and indirectly play |
| | a role in many physiological processes such as the reorganization of the actin cytoskeleton and |
| | in cell motility. Binds 2 calcium ions. Calcium binding is cooperative. |
