

Datasheet for ABIN7126845 anti-Resistin antibody (AA 19-108)

100 μg

Overview

Quantity:

Target:	Resistin (RETN)
Binding Specificity:	AA 19-108
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This Resistin antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (Formalin-fixed Sections) (IHC (f))
Product Details	
Immunogen:	Recombinant fragment of human RETN protein (around aa 19-108) (exact sequence is proprietary)
Isotype:	lgG2b
Specificity:	The cysteine-rich, adipose tissue-specific, secretory factor resistin (resistance to Insulin) also known as ADSF, is a secreted hormone that potentially links obesity to diabetes. Resistin is rich in serine and cysteine residues and contains a unique cysteine repeat motif. Resistin and the resistin-like molecules share the characteristic cysteine composition and other signature features. Resistin-like i± is a secreted protein that has restricted tissue distribution and is most highly expressed in adipose tissue. Another family member, resistinlike i², is a secreted protein expressed only in the gastrointestinal tract, particularly in the colon, in both mouse and human. Resistin-like i² expression is highest in proliferative epithelial cells and is markedly increased in tumors, suggesting a role in intestinal proliferation.

Product Details

delta2, RETN1, RSTN, XCP1,Resistin (RETN) Cellular localisation: Secreted Molecular Weight: 13kDa Gene ID: 56729, 283091 UniProt: Q9HD89 Pathways: Feeding Behaviour, Smooth Muscle Cell Migration Application Details Application Notes: Known_Application: Western Blot (2-4 µg/mL), Immunohistochemistry (Formalin-fixed) (1-2 g/mL for 30 minutes at RT), (Staining of formalin-fixed tissues requires heating tissue sections)	Cross-Reactivity (Details):	Human.
Target: Resistin (RETN) Alternative Name: RETN (RETN Products) Background: Adipose tissue specific secretory factor, ADSF, C/EBP epsiton regulated myeloid specific secreted cysteine rich protein precursor 1, Cysteine-rich secreted protein A12-alpha-like 2, Cysteine-rich secreted protein FIZZ3, dri, FIZZ3, Found in inflammatory zone 3, HXCP1, Resistin (RETN) Cellular localisation: Secreted Molecular Weight: 13kDa Gene ID: 56729, 283091 UniProt: Q9HD89 Pathways: Feeding Behaviour, Smooth Muscle Cell Migration Application Details Application Notes: Known Application: Western Blot (2-4 μg/mL), Immunohistochemistry (Formalin-fixed) (1-2 g/mL for 30 minutes at RT), (Staining of formalin-fixed tissues requires heating tissue sectic in 10 mM Tris with 1 mM EDTA, pH 9.0, for 45 min at 95 °C followed by cooling at RT for 20 minutes), Optimal dilution for a specific application should be determined. Positive_Controt: Human heart, bone marrow or spieen. Human heart tissue lysate. Restrictions: For Research Use only Handling Concentration: 1.0 mg/mL Buffer: Prepared in 10 mM PBS, WITHOUT BSA and Azide. Preservative: Azide free Storage: -20 °C,80 °C	Purification:	1.0mg/ml of Ab purified from Bioreactor by Protein A/G.
Alternative Name: RETN (RETN Products) Background: Adipose tissue specific secretory factor, ADSF, C/EBP epsilon regulated myeloid specific secreted cysteine rich protein precursor 1, Cysteine-rich secreted protein A12-alpha-like 2, Cysteine-rich secreted protein FIZZ3, dri, FIZZ3, Found in inflammatory zone 3, HXCP1, Residelta2, RETN1, RSTN, XCP1, Resistin (RETN) Cellular localisation: Secreted Molecular Weight: 13kDa Gene ID: 56729, 283091 UniProt: Q9HD89 Pathways: Feeding Behaviour, Smooth Muscle Cell Migration Application Details Application Notes: Known-Application: Western Blot (2-4 µg/mL), Immunohistochemistry (Formalin-fixed) (1-2 g/mL for 30 minutes at RT), (Staining of formalin-fixed tissues requires heating tissue sectic in 10 mM Tris with 1 mM EDTA, pH 9.0, for 45 min at 95 °C followed by cooling at RT for 20 minutes), Optimal dilution for a specific application should be determined. Positive_Control: Human heart, bone marrow or spleen. Human heart tissue lysate. Restrictions: For Research Use only Handling Concentration: 1.0 mg/mL Buffer: Prepared in 10 mM PBS, WiTHOUT BSA and Azide. Preservative: Azide free Storage: -20 °C,-80 °C	Target Details
