Background:	Synonyms: EMAP115, E-MAP-115, Ensconsin, Epithelial microtubule-associated protein of 115

Target Details

kDa, Microtubule-associated protein 7, MAP-7, MAP7

Background: Microtubule-stabilizing protein that may play an important role during reorganization of microtubules during polarization and differentiation of epithelial cells. Associates with microtubules in a dynamic manner. May play a role in the formation of intercellular contacts. Colocalization with TRPV4 results in the redistribution of TRPV4 toward the membrane and may link cytoskeletal microfilaments.
