Datasheet for ABIN7140123 anti-LEO1 antibody (AA 2-24) (Biotin)

Overview

Quantity:	100 µL
Target:	LE01
Binding Specificity:	AA 2-24
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This LEO1 antibody is conjugated to Biotin
Application:	ELISA

Product Details

Immunogen:	Peptide sequence from Human RNA polymerase-associated protein LEO1 protein (2-24AA)
Isotype:	lgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	LE01
Alternative Name:	LE01 (LE01 Products)
Background:	Background: Component of the PAF1 complex (PAF1C) which has multiple functions during
	transcription by RNA polymerase II and is implicated in regulation of development and

maintenance of embryonic stem cell pluripotency. PAF1C associates with RNA polymerase II
through interaction with POLR2A CTD non-phosphorylated and \'Ser-2\'- and \'Ser-5\'-
phosphorylated forms and is involved in transcriptional elongation, acting both indepentently
and synergistically with TCEA1 and in cooperation with the DSIF complex and HTATSF1.
PAF1C is required for transcription of Hox and Wnt target genes. PAF1C is involved in
hematopoiesis and stimulates transcriptional activity of KMT2A/MLL1, it promotes
leukemogenesis through association with KMT2A/MLL1-rearranged oncoproteins, such as
KMT2A/MLL1-MLLT3/AF9 and KMT2A/MLL1-MLLT1/ENL. PAF1C is involved in histone
modifications such as ubiquitination of histone H2B and methylation on histone H3 \'Lys-4\'
(H3K4me3). PAF1C recruits the RNF20/40 E3 ubiquitin-protein ligase complex and the E2
enzyme UBE2A or UBE2B to chromatin which mediate monoubiquitination of \'Lys-120\' of
histone H2B (H2BK120ub1), UB2A/B-mediated H2B ubiquitination is proposed to be coupled to
transcription. PAF1C is involved in mRNA 3\' end formation probably through association with
cleavage and poly(A) factors. In case of infection by influenza A strain H3N2, PAF1C associates
with viral NS1 protein, thereby regulating gene transcription. Involved in polyadenylation of
mRNA precursors. Connects PAF1C to Wnt signaling.
Aliases: Gm185 antibody, LEO1 antibody, LEO1_HUMAN antibody, LOC123439 antibody,
Paf1/RNA polymerase II complex component antibody, Replicative senescence down regulated
leo1 like protein antibody, Replicative senescence down-regulated leo1-like protein antibody,
Replicative senescence downregulated leo1 like antibody, RNA polymerase associated protein
LEO1 antibody, RNA polymerase-associated protein LEO1 antibody, Senescence downregulated
leo1 like antibody

UniProt:	Q8WVC0
Pathways:	Stem Cell Maintenance
Application Details	
Application Notes:	Optimal working dilution should be determined by the investigator.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	Preservative: 0.03 % Proclin 300 Constituents: 50 % Glycerol, 0.01M PBS, pH 7.4

Handling

Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C,-80 °C
Storage Comment:	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
