# Target Details

| Target:           | ABI5   |
|-------------------|--|
| Alternative Name: | ABI5 (ABI5 Products)   |
| Background:       | Background: Participates in ABA-regulated gene expression during seed development and    |
|                   | subsequent vegetative stage by acting as the major mediator of ABA repression of growth. |

#### **Target Details**

Binds to the embryo specification element and the ABA-responsive element (ABRE) of the Dc3 gene promoter and to the ABRE of the Em1 and Em6 genes promoters. Can also trans-activate its own promoter, suggesting that it is autoregulated. Plays a role in sugar-mediated senescence.
