Target Details

Target:	NSUN4
Alternative Name:	NSUN4 (NSUN4 Products)
Background:	Background: Involved in mitochondrial ribosome assembly. 5-methylcytosine rRNA methyltransferase that probably is involved in mitochondrial ribosome small subunit (SSU)

Target Details

maturation by methylation of mitochondrial 12S rRNA, the function is independent of MTERFD2/MTERF4 and assembled mitochondrial ribosome large subunit (LSU). Targeted to LSU by MTERFD2/MTERF4 and probably is involved in a final step in ribosome biogenesis to ensure that SSU and LSU are assembled. In vitro can methylate 16S rRNA of the LSU, the methylation is enhanced by MTERFD/MTERF4.
