Datasheet for ABIN7143598

anti-ASIP antibody (AA 23-112) (Biotin)

Overview

Quantity:	100 µg
Target:	ASIP
Binding Specificity:	AA 23-112
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This ASIP antibody is conjugated to Biotin
Application:	ELISA

Product Details

Immunogen:	Recombinant Human Agouti-signaling protein (23-112AA)
Isotype:	IgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	ASIP
Alternative Name:	ASIP (ASIP Products)
Background:	Background: Involved in the regulation of melanogenesis. The binding of ASP to MC1R precludes alpha-MSH initiated signaling and thus blocks production of cAMP, leading to a

Target Details

down-regulation of eumelanogenesis (brown/black pigment) and thus increasing synthesis of pheomelanin (yellow/red pigment). In higher primates, agouti may affect the quality of hair pigmentation rather than its pattern of deposition. Could well play a role in neuroendocrine aspects of melanocortin action. May have some functional role in regulating the lipid metabolism with adipocytes.

Aliases: ASIP antibody, AGTI antibody, AGTIL antibody, ASP antibody, Agouti-signaling protein antibody, ASP antibody, Agouti switch protein antibody

UniProt: [P42127](#)

Pathways: [Cell-Cell Junction Organization](#), [Feeding Behaviour](#)

Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

Handling

Format: Liquid

Buffer: Preservative: 0.03 % Proclin 300
Constituents: 50 % Glycerol, 0.01M PBS, PH 7.4

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C,-80 °C

Storage Comment: Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
