Datasheet for ABIN7145314 anti-BOK antibody (AA 15-103)

Image

Overview

Quantity:	100 µg
Target:	ВОК
Binding Specificity:	AA 15-103
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This BOK antibody is un-conjugated
Application:	ELISA, Immunohistochemistry (IHC)

Product Details

Immunogen:	Recombinant Human Bcl-2-related ovarian killer protein (15-103AA)
Isotype:	lgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	ВОК
Alternative Name:	BOK (BOK Products)
Background:	Background: Isoform 1: Apoptosis regulator that functions through different apoptotic signaling
	pathways (PubMed:27076518, PubMed:15102863, PubMed:20673843). Plays a roles as pro-

apoptotic protein that positively regulates intrinsic apoptotic process in a BAX- and BAK1-
dependent manner or in a BAX- and BAK1-independent manner (PubMed:27076518,
PubMed:15102863). In response to endoplasmic reticulum stress promotes mitochondrial
apoptosis through downstream BAX/BAK1 activation and positive regulation of PERK-mediated
unfolded protein response (By similarity). Activates apoptosis independently of
heterodimerization with survival-promoting BCL2 and BCL2L1 through induction of
mitochondrial outer membrane permeabilization, in a BAX- and BAK1-independent manner, in
response to inhibition of ERAD-proteasome degradation system, resulting in cytochrome c
release (PubMed:27076518). In response to DNA damage, mediates intrinsic apoptotic process
in a TP53-dependent manner (PubMed:15102863). Plays a role in granulosa cell apoptosis by
CASP3 activation (PubMed:20673843). Plays a roles as anti-apoptotic protein during neuronal
apototic process, by negatively regulating poly ADP-ribose polymerase-dependent cell death
through regulation of neuronal calcium homeostasis and mitochondrial bioenergetics in
response to NMDA excitation (By similarity). In addition to its role in apoptosis, may regulate
trophoblast cell proliferation during the early stages of placental development, by acting on
G1/S transition through regulation of CCNE1 expression (PubMed:19942931). May also play a
role as an inducer of autophagy by disrupting interaction between MCL1 and BECN1
(PubMed:24113155).

Aliases: Bcl 2 related ovarian killer protein antibody, Bcl-2-like protein 9 antibody, Bcl-2-related ovarian killer protein antibody, BCL2 related ovarian killer antibody, Bcl2-L-9 antibody, BCL2L9 antibody, BOK antibody, BOK_HUMAN antibody, BOKL antibody, Hbok antibody, MGC4631 antibody

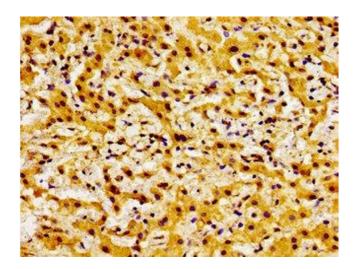

UniProt:	Q9UMX3
Pathways:	Positive Regulation of Endopeptidase Activity
Application Details	
Application Notes:	Recommended dilution: IHC:1:20-1:200,
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	Preservative: 0.03 % Proclin 300 Constituents: 50 % Glycerol, 0.01M PBS, pH 7.4

Handling

Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C,-80 °C
Storage Comment:	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
