Datasheet for ABIN7145592

anti-BAAT antibody (AA 313-400) (HRP)

Go to Product page

Overview

Quantity:	100 µg
Target:	BAAT
Binding Specificity:	AA 313-400
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This BAAT antibody is conjugated to HRP
Application:	ELISA

Product Details

Immunogen:	Recombinant Human Bile acid-CoA:amino acid N-acyltransferase protein (313-400AA)
Isotype:	IgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	BAAT
Alternative Name:	BAAT (BAAT Products)
Background:	Background: Involved in bile acid metabolism. In liver hepatocytes catalyzes the second step in the conjugation of C24 bile acids (choloneates) to glycine and taurine before excretion into bile

Target Details

	canaliculi. The major components of bile are cholic acid and chenodeoxycholic acid. In a first step the bile acids are converted to an acyl-CoA thioester, either in peroxisomes (primary bile acids deriving from the cholesterol pathway), or cytoplasmic at the endoplasmic reticulum (secondary bile acids). May catalyze the conjugation of primary or secondary bile acids, or both. The conjugation increases the detergent properties of bile acids in the intestine, which facilitates lipid and fat-soluble vitamin absorption. In turn, bile acids are deconjugated by bacteria in the intestine and are recycled back to the liver for reconjugation (secondary bile acids). May also act as an acyl-CoA thioesterase that regulates intracellular levels of free fatty acids. In vitro, catalyzes the hydrolysis of long- and very long-chain saturated acyl-CoAs to the free fatty acid and coenzyme A (CoASH), and conjugates glycine to these acyl-CoAs. Aliases: FLJ20300 antibody, BAAT antibody, BAAT_HUMAN antibody, BACAT antibody, BAT antibody, Bile acid CoA: amino acid N-acyltransferase (glycine N-choloyltransferase) antibody, Bile acid CoA:amino acid N acyltransferase antibody, Bile acid Coenzyme A amino acid N acyltransferase glycine N choloyltransferase antibody, Bile acid Coenzyme A: amino acid N acyltransferase antibody, Bile acid-CoA:amino acid N-acyltransferase antibody, Glycine N choloyltransferase antibody, Glycine N-choloyltransferase antibody, Long chain fatty acyl CoA hydrolase antibody, Long-chain fatty-acyl-CoA hydrolase antibody, MGC104432 antibody
UniProt:	Q14032

Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	Preservative: 0.03 % Proclin 300 Constituents: 50 % Glycerol, 0.01M PBS, PH 7.4
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C,-80 °C
Storage Comment:	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
