Purification:	>95%, Protein G purified

Target Details

Target:	CNOT2
Alternative Name:	CNOT2 (CNOT2 Products)
Background:	Background: Component of the CCR4-NOT complex which is one of the major cellular mRNA deadenylases and is linked to various cellular processes including bulk mRNA degradation,

Target Details

miRNA-mediated repression, translational repression during translational initiation and general transcription regulation. Additional complex functions may be a consequence of its influence on mRNA expression. Required for the CCR4-NOT complex structural integrity. Can repress transcription and may link the CCR4-NOT complex to transcriptional regulation, the repressive function may specifically involve the N-Cor repressor complex containing HDAC3, NCOR1 and NCOR2. Involved in the maintenance of embryonic stem (ES) cell identity.

Aliases: CCR4 associated factor 2 antibody, CCR4 NOT transcription complex subunit 2 antibody, CCR4-associated factor 2 antibody, CCR4-NOT transcription complex subunit 2 antibody, CDC36 antibody, CNOT2 antibody, CNOT2_HUMAN antibody, HSPC131 antibody, MSTP046 antibody, Negative regulator of transcription 2 antibody, NOT2 (negative regulator of transcription 2 yeast) homolog antibody, NOT2 antibody, NOT2H antibody
