Datasheet for ABIN7150229 anti-POLD1 antibody (Catalytic Subunit) (FITC)

Overview

Quantity:	100 µg
Target:	POLD1
Binding Specificity:	AA 1-123, Catalytic Subunit
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This POLD1 antibody is conjugated to FITC
Application:	Please inquire

Product Details

Immunogen:	Recombinant Human DNA polymerase delta catalytic subunit protein (1-123AA)	
Isotype:	lgG	
Cross-Reactivity:	Human	
Purification:	>95%, Protein G purified	

Target Details

Target:	POLD1	
Alternative Name:	POLD1 (POLD1 Products)	
Background:	Background: As the catalytic component of the trimeric (Pol-delta3 complex) and tetrameric	
	DNA polymerase delta complexes (Pol-delta4 complex), plays a crucial role in high fidelity

genome replication, including in lagging strand synthesis, and repair. Exhibits both DNA	
polymerase and 3\'- to 5\'-exonuclease activities (PubMed:16510448, PubMed:1907419	6,
PubMed:20334433, PubMed:24035200, PubMed:24022480). Requires the presence of	
accessory proteins POLD2, POLD3 and POLD4 for full activity. Depending upon the abse	ence
(Pol-delta3) or the presence of POLD4 (Pol-delta4), displays differences in catalytic activ	∕ity.
Most notably, expresses higher proofreading activity in the context of Pol-delta3 compa	red with
that of Pol-delta4 (PubMed:19074196, PubMed:20334433). Although both Pol-delta3 an	d Pol-
delta4 process Okazaki fragments in vitro, Pol-delta3 may be better suited to fulfill this t	ask,
exhibiting near-absence of strand displacement activity compared to Pol-delta4 and sta	lling on
encounter with the 5\'-blocking oligonucleotides. Pol-delta3 idling process may avoid th	е
formation of a gap, while maintaining a nick that can be readily ligated (PubMed:240352	200).
Along with DNA polymerase kappa, DNA polymerase delta carries out approximately ha	lf of
nucleotide excision repair (NER) synthesis following UV irradiation (PubMed:20227374)	. Under
conditions of DNA replication stress, in the presence of POLD3 and POLD4, may catalyz	e the
repair of broken replication forks through break-induced replication (BIR) (PubMed:2431	0611).
Involved in the translesion synthesis (TLS) of templates carrying O6-methylguanine or a	basic
sites (PubMed:19074196).	

Aliases: Polymerase (DNA directed) delta 1 catalytic subunit antibody, CDC2 antibody, CDC2 homolog antibody, CRCS10 antibody, DNA directed DNA polymerase delta 1 antibody, DNA directed polymerase delta 1 antibody, DNA pol delta 1 antibody, DNA polymerase delta catalytic subunit antibody, DNA polymerase subunit delta p125 antibody, DPOD1_HUMAN antibody, MDPL antibody, POLD antibody, POLD 1 antibody, POLD1 antibody, Polymerase (DNA directed) delta 1 catalytic subunit 125 kDa antibody, Polymerase (DNA) delta 1 catalytic subunit antibody, Polymerase DNA directed delta 1 catalytic subunit 125kD antibody, polymerase, DNA, delta antibody

UniProt:	P28340
Pathways:	Telomere Maintenance, DNA Damage Repair, DNA Replication, Chromatin Binding, Synthesis of DNA

Application Details

Restrictions:	For Research Use only
Handling	
Format:	Liquid

Buffer:	Preservative: 0.03 % Proclin 300
	Constituents: 50 % Glycerol, 0.01M PBS, pH 7.4
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be
	handled by trained staff only.
Storage:	-20 °C,-80 °C
Storage Comment:	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
