| membranes (PubMed:24019528). Acts in early endocytic membrane fusion and membrane |
|---|
| trafficking of recycling endosomes (PubMed:15020713, PubMed:17233914, |
| PubMed:20801876). Recruited to endosomal membranes upon nerve growth factor |
| stimulation, indirectly regulates neurite outgrowth (By similarity). Plays a role in myoblast fusion |
| (By similarity). Involved in the unidirectional retrograde dendritic transport of endocytosed |
| BACE1 and in efficient sorting of BACE1 to axons implicating a function in neuronal APP |
| processing (By similarity). Plays a role in the formation of the ciliary vesicle (CV), an early step in |
| cilium biogenesis. Proposed to be required for the fusion of distal appendage vesicles (DAVs) to |
| form the CV by recruiting SNARE complex component SNAP29. Is required for recruitment of |
| transition zone proteins CEP290, RPGRIP1L, TMEM67 and B9D2, and of IFT20 following DAV |
| reorganization before Rab8-dependent ciliary membrane extension. Required for the loss of |
| CCP110 form the mother centriole essential for the maturation of the basal body during |
| ciliogenesis (PubMed:25686250). |
