Quantity:	100 µg
Target:	EXOSC3
Binding Specificity:	AA 2-275
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This EXOSC3 antibody is conjugated to FITC
Application:	Please inquire

Product Details

Immunogen:	Recombinant Human Exosome complex component RRP40 protein (2-275AA)
Isotype:	lgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	EXOSC3
Alternative Name:	EXOSC3 (EXOSC3 Products)
Background:	Background: Non-catalytic component of the RNA exosome complex which has 3\'->5\'
	exoribonuclease activity and participates in a multitude of cellular RNA processing and

	degradation events. In the nucleus, the RNA exosome complex is involved in proper maturation
	of stable RNA species such as rRNA, snRNA and snoRNA, in the elimination of RNA processing
	by-products and non-coding \'pervasive\' transcripts, such as antisense RNA species and
	promoter-upstream transcripts (PROMPTs), and of mRNAs with processing defects, thereby
	limiting or excluding their export to the cytoplasm. The RNA exosome may be involved in Ig
	class switch recombination (CSR) and/or Ig variable region somatic hypermutation (SHM) by
	targeting AICDA deamination activity to transcribed dsDNA substrates. In the cytoplasm, the
	RNA exosome complex is involved in general mRNA turnover and specifically degrades
	inherently unstable mRNAs containing AU-rich elements (AREs) within their 3\' untranslated
	regions, and in RNA surveillance pathways, preventing translation of aberrant mRNAs. It seems
	to be involved in degradation of histone mRNA. The catalytic inactive RNA exosome core
	complex of 9 subunits (Exo-9) is proposed to play a pivotal role in the binding and presentation
	of RNA for ribonucleolysis, and to serve as a scaffold for the association with catalytic subunits
	and accessory proteins or complexes. EXOSC3 as peripheral part of the Exo-9 complex
	stabilizes the hexameric ring of RNase PH-domain subunits through contacts with EXOSC9 and
	EXOSC5.
	Aliases: EXOSC3 antibody, RRP40 antibody, CGI-102Exosome complex component RRP40
	antibody, Exosome component 3 antibody, Ribosomal RNA-processing protein 40 antibody, p10
	antibody
UniProt:	Q9NQT5
Pathways:	Regulation of Leukocyte Mediated Immunity, Positive Regulation of Immune Effector Process,
	Production of Molecular Mediator of Immune Response, SARS-CoV-2 Protein Interactome
Application Details	

Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	Preservative: 0.03 % Proclin 300 Constituents: 50 % Glycerol, 0.01M PBS, PH 7.4
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
