| Quantity: | 100 µg |
|----------------------|---|
| Target: | EXOSC5 |
| Binding Specificity: | AA 1-235 |
| Reactivity: | Human |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Conjugate: | This EXOSC5 antibody is conjugated to HRP |
| Application: | ELISA |

Product Details

| Immunogen: | Recombinant Human Exosome complex component RRP46 protein (1-235AA) |
|-------------------|---|
| Isotype: | lgG |
| Cross-Reactivity: | Human |
| Purification: | >95%, Protein G purified |

Target Details

| Target: | EXOSC5 |
|-------------------|---|
| Alternative Name: | EXOSC5 (EXOSC5 Products) |
| Background: | Background: Non-catalytic component of the RNA exosome complex which has 3\'->5\' |
| | exoribonuclease activity and participates in a multitude of cellular RNA processing and |

| degradation events. In the nucleus, the RNA exosome complex is involved in proper maturation |
|--|
| of stable RNA species such as rRNA, snRNA and snoRNA, in the elimination of RNA processing |
| by-products and non-coding \'pervasive\' transcripts, such as antisense RNA species and |
| promoter-upstream transcripts (PROMPTs), and of mRNAs with processing defects, thereby |
| limiting or excluding their export to the cytoplasm. The RNA exosome may be involved in Ig |
| class switch recombination (CSR) and/or Ig variable region somatic hypermutation (SHM) by |
| targeting AICDA deamination activity to transcribed dsDNA substrates. In the cytoplasm, the |
| RNA exosome complex is involved in general mRNA turnover and specifically degrades |
| inherently unstable mRNAs containing AU-rich elements (AREs) within their 3\' untranslated |
| regions, and in RNA surveillance pathways, preventing translation of aberrant mRNAs. It seems |
| to be involved in degradation of histone mRNA. The catalytic inactive RNA exosome core |
| complex of 9 subunits (Exo-9) is proposed to play a pivotal role in the binding and presentation |
| of RNA for ribonucleolysis, and to serve as a scaffold for the association with catalytic subunits |
| and accessory proteins or complexes. |

| Handling | |
|--------------------|---|
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage: | -20 °C,-80 °C |
| Storage Comment: | Upon receipt, store at -20°C or -80°C. Avoid repeated freeze. |
