	the robustness of the circadian clock oscillation. The SCF(FBXL21) complex mainly acts in the	
	cytosol and mediates ubiquitination of CRY proteins (CRY1 and CRY2), leading to CRY proteins	
	stabilization. The SCF(FBXL21) complex counteracts the activity of the SCF(FBXL3) complex	
	and protects CRY proteins from degradation. Involved in the hypothalamic suprachiasmatic	
	nucleus (SCN) clock regulating temporal organization of the daily activities (By similarity).
