### Target Details

Target:	FDPS
Alternative Name:	FDPS ( <a href="#">FDPS Products</a> )
Background:	Background: Key enzyme in isoprenoid biosynthesis which catalyzes the formation of farnesyl diphosphate (FPP), a precursor for several classes of essential metabolites including sterols,

## Target Details

dolichols, carotenoids, and ubiquinones. FPP also serves as substrate for protein farnesylation and geranylgeranylation. Catalyzes the sequential condensation of isopentenyl pyrophosphate with the allylic pyrophosphates, dimethylallyl pyrophosphate, and then with the resultant geranylpyrophosphate to the ultimate product farnesyl pyrophosphate.

Aliases: (2E antibody, (2E,6E) farnesyl diphosphate synthase antibody, 6E)-farnesyl diphosphate synthase antibody, Dimethylallyltransferase antibody, Farnesyl diphosphate synthase antibody, Farnesyl diphosphate synthetase antibody, Farnesyl pyrophosphate synthase antibody, Farnesyl pyrophosphate synthetase antibody, Fdps antibody, FPP synthase antibody, FPP synthetase antibody, FPPS antibody, FPPS\_HUMAN antibody, FPS antibody, Geranyltransferase antibody
