### Target Details

Target:	HINFP
Alternative Name:	HINFP (HINFP Products)
Background:	Background: Transcriptional repressor that binds to the consensus sequence 5\'-CGGACGTT-
	3\' and to the RB1 promoter. Transcriptional activator that promotes histone H4 gene

transcription at the G1/S phase transition in conjunction with NPAT. Also activates transcription of the ATM and PRKDC genes. Autoregulates its expression by associating with its own promoter.
