Target Details

Target:	INTS6
Alternative Name:	INTS6 (INTS6 Products)

Target Details

Integrator complex is associated with the C-terminal domain (CTD) of RNA polymerase II largest subunit (POLR2A) and is recruited to the U1 and U2 snRNAs genes (Probable). Mediates recruitment of cytoplasmic dynein to the nuclear envelope, probably as component of the INT complex (PubMed:23904267). May have a tumor suppressor role, an ectopic expression suppressing tumor cell growth (PubMed:15254679, PubMed:16239144).
