## anti-RORB antibody (AA 385-470)

$\sim$							
	1//	$\Box$	r۱	/ [	$\bigcirc$	1	٨,

Quantity:	100 μL
Target:	RORB
Binding Specificity:	AA 385-470
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This RORB antibody is un-conjugated
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

## **Product Details**

Immunogen:	KLH conjugated synthetic peptide derived from human RORB	
Isotype:	IgG	
Cross-Reactivity:	Mouse, Rat	
Predicted Reactivity:	Human,Dog,Cow,Sheep,Horse	
Purification:	Purified by Protein A.	

#### **Target Details**

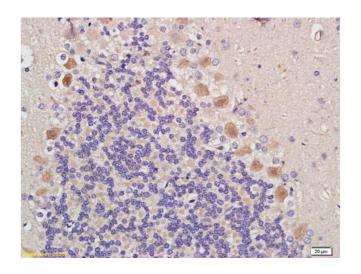

## **Target Details**

ROR beta (RORB Products)		
Synonyms: NR1F2, Nuclear receptor ROR-beta, Nuclear receptor RZR beta, Nuclear receptor		
RZR-beta, Nuclear receptor subfamily 1 group F member 2, RAR related orphan receptor B, RAF		
related orphan receptor beta, Retinoic acid binding receptor beta, Retinoid-related orphan		
receptor-beta, ROR BETA, Rorb, RORB_HUMAN, RZR BETA, RZRB.		
Background: Nuclear receptor that binds DNA as a monomer to ROR response elements		
(RORE) containing a single core motif half-site 5'-AGGTCA-3' preceded by a short A-T-rich		
sequence. Considered to have intrinsic transcriptional activity, have some natural ligands such		
as all-trans retinoic acid (ATRA) and other retinoids which act as inverse agonists repressing		
the transcriptional activity. Required for normal postnatal development of rod and cone		
photoreceptor cells. Modulates rod photoreceptors differentiation at least by inducing the		
transcription factor NRL-mediated pathway. In cone photoreceptor cells, regulates transcription		
of OPN1SW. Involved in the regulation of the period length and stability of the circadian rhythm.		
May control cytoarchitectural patterning of neocortical neurons during development. May act in		
a dose-dependent manner to regulate barrel formation upon innervation of layer IV neurons by		
thalamocortical axons. May play a role in the suppression of osteoblastic differentiation		
through the inhibition of RUNX2 transcriptional activity (By similarity)

### Handling

Concentration:	1 μg/μL
Buffer:	0.01M TBS( pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.
Expiry Date:	12 months
