Datasheet for ABIN715873 anti-RORB antibody (AA 385-470) (Biotin)

Overview

Quantity:	100 μL
Target:	RORB
Binding Specificity:	AA 385-470
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This RORB antibody is conjugated to Biotin
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human RORB
lsotype:	lgG
Cross-Reactivity:	Mouse, Rat
Predicted Reactivity:	Human,Dog,Cow,Sheep,Horse
Purification:	Purified by Protein A.
Target Details	
Taurat	

Target:	RORB
Alternative Name:	ROR beta (RORB Products)

Target Details	
Background:	Synonyms: NR1F2, Nuclear receptor ROR-beta, Nuclear receptor RZR beta, Nuclear receptor
	RZR-beta, Nuclear receptor subfamily 1 group F member 2, RAR related orphan receptor B, RAR
	related orphan receptor beta, Retinoic acid binding receptor beta, Retinoid-related orphan
	receptor-beta, ROR BETA, Rorb, RORB_HUMAN, RZR BETA, RZRB.
	Background: Nuclear receptor that binds DNA as a monomer to ROR response elements
	(RORE) containing a single core motif half-site 5'-AGGTCA-3' preceded by a short A-T-rich
	sequence. Considered to have intrinsic transcriptional activity, have some natural ligands such
	as all-trans retinoic acid (ATRA) and other retinoids which act as inverse agonists repressing
	the transcriptional activity. Required for normal postnatal development of rod and cone
	photoreceptor cells. Modulates rod photoreceptors differentiation at least by inducing the
	transcription factor NRL-mediated pathway. In cone photoreceptor cells, regulates transcription
	of OPN1SW. Involved in the regulation of the period length and stability of the circadian rhythm.
	May control cytoarchitectural patterning of neocortical neurons during development. May act in
	a dose-dependent manner to regulate barrel formation upon innervation of layer IV neurons by
	thalamocortical axons. May play a role in the suppression of osteoblastic differentiation
	through the inhibition of RUNX2 transcriptional activity (By similarity)
Gene ID:	6096

Gene ID:	6096
UniProt:	Q92753
Pathways:	Nuclear Receptor Transcription Pathway, Steroid Hormone Mediated Signaling Pathway

Application Details

Application Notes:	WB 1:300-5000
	IHC-P 1:200-400
	IHC-F 1:100-500
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin

Handling	
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C for 12 months.
Expiry Date:	12 months
