Datasheet for ABIN7160831  
**anti-NLRP6 antibody (AA 154-306)**

2 Images

Overview

Quantity:	100 µg
Target:	NLRP6
Binding Specificity:	AA 154-306
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This NLRP6 antibody is un-conjugated
Application:	ELISA, Immunohistochemistry (IHC), Immunofluorescence (IF)

Product Details

Immunogen:	Recombinant Human NACHT, LRR and PYD domains-containing protein 6 protein (154-306AA)
Isotype:	IgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	NLRP6
Alternative Name:	NLRP6 ( <a href="#">NLRP6 Products</a> )
Background:	Background: As the sensor component of the NLRP6 inflammasome, plays a crucial role in innate immunity and inflammation. In response to pathogens and other damage-associated

## Target Details

---

signals, initiates the formation of the inflammasome polymeric complex, made of NLRP6, PYCARD and CASP1 (and possibly CASP4 and CASP5). Recruitment of proCASP1 to the inflammasome promotes its activation and CASP1-catalyzed IL1B and IL18 maturation and secretion in the extracellular milieu. The precise NLRP6 activation stimulus has not been identified yet (By similarity) (PubMed:12387869). Essential for gut mucosal self-renewal and proliferation. Maintains intestinal homeostasis and a healthy intestinal microbiota. This function is, at least partially, mediated by IL18, and not IL1B, produced by nonhematopoietic cells. Influences intestinal barrier function and microbial homeostasis through the regulation of goblet cell mucus secretion. Acts by promoting autophagy in goblet cells, an essential step for mucus granule exocytosis. Its role in goblet cell physiology is inflammasome-dependent, but IL1B- and IL18-independent. During systemic bacterial infections, may negatively regulate inflammatory signaling and inhibit the influx of monocytes and neutrophils to the circulation and to the peritoneum. May promote peripheral nerve recovery following injury via an inflammasome-independent mechanism (By similarity).

Aliases: Angiotensin II/vasopressin receptor antibody, AVR antibody, CLR11.4 antibody, NACHT, leucine rich repeat and PYD containing 6 antibody, NACHT, LRR and PYD containing protein 6 antibody, NACHT, LRR and PYD domains-containing protein 6 antibody, NAVR antibody, NAVR/AVR antibody, NLR family, pyrin domain containing 6 antibody, Nlrp6 antibody, NLRP6\_HUMAN antibody, Nucleotide binding oligomerization domain, leucine rich repeat and pyrin domain containing 6 antibody, PAN3 antibody, PYPAF5 antibody, PYRIN containing APAF1 like protein 5 antibody, PYRIN-containing APAF1-like protein 5 antibody

Pathways: [Inflammasome](#)

## Application Details

---

Application Notes: Recommended dilution: IHC:1:200-1:500, IF:1:50-1:200,

---

Restrictions: For Research Use only

## Handling

---

Format: Liquid

---

Buffer: Preservative: 0.03 % Proclin 300  
Constituents: 50 % Glycerol, 0.01M PBS, pH 7.4

---

Preservative: ProClin

---

## Handling

Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C,-80 °C
Storage Comment:	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.

## Images

### Immunohistochemistry

**Image 1.** IHC image of ABIN7160831 diluted at 1:400 and staining in paraffin-embedded human glioma performed on a Leica Bond™ system. After dewaxing and hydration, antigen retrieval was mediated by high pressure in a citrate buffer (pH 6.0). Section was blocked with 10% normal goat serum 30min at RT. Then primary antibody (1% BSA) was incubated at 4°C overnight. The primary is detected by a biotinylated secondary antibody and visualized using an HRP conjugated SP system.

### Immunofluorescence

**Image 2.** Immunofluorescence staining of MCF-7 cells with ABIN7160831 at 1:133, counter-stained with DAPI. The cells were fixed in 4% formaldehyde, permeabilized using 0.2% Triton X-100 and blocked in 10% normal Goat Serum. The cells were then incubated with the antibody overnight at 4°C. The secondary antibody was Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
