	neutral or slightly basic pH . The proteasome has an ATP-dependent proteolytic activity. This	
	unit is responsible of the chymotrypsin-like activity of the proteasome and is one of the	
	principal target of the proteasome inhibitor bortezomib. May catalyze basal processing of	
	intracellular antigens. Plays a role in the protection against oxidative damage through the Nrf2-	
	ARE pathway (By similarity).
