Datasheet for ABIN7165642

anti-HOOK3 antibody (AA 357-455) (Biotin)

Quantity:	100 µg
Target:	НООКЗ
Binding Specificity:	AA 357-455
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This HOOK3 antibody is conjugated to Biotin
Application:	ELISA

Product Details

Immunogen:	Recombinant Human Protein Hook homolog 3 protein (357-455AA)
lsotype:	lgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	HOOK3
Alternative Name:	HOOK3 (HOOK3 Products)
Background:	Background: Probably serves as a target for the spiC protein from Salmonella typhimurium,
	which inactivates it, leading to a strong alteration in cellular trafficking (By similarity).

Component of the FTS/Hook/FHIP complex (FHF complex). The FHF complex may function to
promote vesicle trafficking and/or fusion via the homotypic vesicular protein sorting complex
(the HOPS complex). May regulate clearance of endocytosed receptors such as MSR1.
Participates in defining the architecture and localization of the Golgi complex. Acts as an
adapter protein linking the dynein motor complex to various cargos and converts dynein from a
non-processive to a highly processive motor in the presence of dynactin. Facilitates the
interaction between dynein and dynactin and activates dynein processivity (the ability to move
along a microtubule for a long distance without falling off the track) (PubMed:25035494).
Aliases: FLJ31058 antibody, h-hook3 antibody, hHK3 antibody, HK3 antibody, hook3 antibody,
HOOK3_HUMAN antibody, OTTHUMP00000229200 antibody, Protein Hook homolog 3 antibody
