Target Details

pulmonary endothelial cell (EC) barrier function. Involved in PKA-mediated moesin dephosphorylation which is important in EC barrier protection against thrombin stimulation. Promotes the interaction of PPP1CA with RPSA/LAMR1 and in turn facilitates the dephosphorylation of RPSA/LAMR1. Involved in the regulation of endothelial cell filopodia extension. May be a downstream target for TGF-beta1 signaling cascade in endothelial cells. Aliases: ANKRD4 antibody, Ankyrin repeat domain containing protein 4 antibody, ankyrin repeat domain protein 4 antibody, Ankyrin repeat domain-containing protein 4 antibody, CAAX box protein TIMAP antibody, hTIMAP antibody, KIAA0823 antibody, PP16B_HUMAN antibody, PPP1R16B antibody, Protein phosphatase 1 regulatory inhibitor subunit 16B antibody, protein phosphatase 1, regulatory (inhibitor) subunit 16B antibody, TGF beta inhibited membrane associated protein antibody, TGF-beta-inhibited membrane-associated protein antibody, TIMAP antibody
