## **anti-DDR1 antibody (pTyr513) (Biotin)**

[Go to Product page](#)

### Overview

|                      |                                                                                                                                                  |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Quantity:            | 100 µL                                                                                                                                           |
| Target:              | DDR1                                                                                                                                             |
| Binding Specificity: | pTyr513                                                                                                                                          |
| Reactivity:          | Human                                                                                                                                            |
| Host:                | Rabbit                                                                                                                                           |
| Clonality:           | Polyclonal                                                                                                                                       |
| Conjugate:           | This DDR1 antibody is conjugated to Biotin                                                                                                       |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)),<br>Immunohistochemistry (Frozen Sections) (IHC (fro)) |

### Product Details

|                       |                                                                                                            |
|-----------------------|------------------------------------------------------------------------------------------------------------|
| Immunogen:            | KLH conjugated synthetic phosphopeptide derived from human MCK10 around the phosphorylation site of Tyr513 |
| Isotype:              | IgG                                                                                                        |
| Cross-Reactivity:     | Human                                                                                                      |
| Predicted Reactivity: | Mouse,Rat,Cow,Pig,Horse                                                                                    |
| Purification:         | Purified by Protein A.                                                                                     |

### Target Details

| Alternative Name: | MCK10 ( <a href="#">DDR1 Products</a> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Background:       | <p>Synonyms: MCK10 phospho Y513, p-MCK10 phospho Y513, CAK, CD167a, DDR1CD 167, CD167, Cell adhesion kinase, DDR 1, DDR, DDR1, Discoidin domain receptor, Discoidin receptor tyrosine kinase isoform a, EDDR 1, Epithelial discoidin domain receptor 1, Epithelial specic receptor kinase, Mammarian carcinoma kinase 10, Neuroepithelial tyrosine kinase, Neurotrophic tyrosine kinase receptor type 4, NTRK 4, PTK 3, PTK 3A protein tyrosine kinase 3A, Receptor tyrosine kinase NEP, RTK 6, TRK E, Tyrosine kinase receptor E, DDR1_HUMAN.</p> <p>Background: Receptor tyrosine kinases (RTKs) play a key role in the communication of cells with their microenvironment. These molecules are involved in the regulation of cell growth, differentiation and metabolism. The protein encoded by this gene is a RTK that is widely expressed in normal and transformed epithelial cells and is activated by various types of collagen. This protein belongs to a subfamily of tyrosine kinase receptors with a homology region to the Dictyostelium discoideum protein discoidin I in their extracellular domain. Its autophosphorylation is achieved by all collagens so far tested (type I to type VI). In situ studies and Northern-blot analysis showed that expression of this encoded protein is restricted to epithelial cells, particularly in the kidney, lung, gastrointestinal tract, and brain. In addition, this protein is significantly over-expressed in several human tumors from breast, ovarian, esophageal, and pediatric brain. This gene is located on chromosome 6p21.3 in proximity to several HLA class I genes. Alternative splicing of this gene results in multiple transcript variants.</p> |
| Gene ID:          | 780                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
