## Target Details

Target:	CHML	
Alternative Name:	CHML (CHML Products)	
Background:	ackground: Background: Substrate-binding subunit (component A) of the Rab geranylgeranyltransfera	

#### **Target Details**

(GGTase) complex. Binds unprenylated Rab proteins and presents the substrate peptide to the catalytic component B. The component A is thought to be regenerated by transferring its prenylated Rab back to the donor membrane. Less effective than CHM in supporting prenylation of Rab3 family.
