Cross-Reactivity:	Human
Purification:	Antigen Affinity Purified

Target Details

Target:	Regulator of G Protein Signaling 9 Binding Protein (RGS9BP)
Alternative Name:	RGS9BP (RGS9BP Products)
Background:	Background: Regulator of G protein-coupled receptor (GPCR) signaling in phototransduction. Participates in the recovery phase of visual transduction via its interaction with RGS9-1 isoform.

Target Details

Acts as a membrane-anchor that mediates the targeting of RGS9-1 to the photoreceptor outer segment, where phototransduction takes place. Enhances the ability of RGS9-1 to stimulate G protein GTPase activity, allowing the visual signal to be terminated on the physiologically time scale. It also controls the proteolytic stability of RGS9-1, probably by protecting it from degradation (By similarity).

Aliases: RGS9BP antibody, R9AP antibody, Regulator of G-protein signaling 9-binding protein antibody, RGS9-anchoring protein antibody
