Target Details

Background:	Synonyms: ATX, Autotaxin,E NPP 2, E-NPP 2, Ectonucleotide		
	pyrophosphatase/phosphodiesterase 2, Ectonucleotide pyrophosphatase/phosphodiesterase		
	family member 2, Enpp2, ENPP2_HUMAN, Extracellular lysophospholipase D, LysoPLD, PDNP2.		
	Background: Hydrolyzes lysophospholipids to produce lysophosphatidic acid (LPA) in		
	extracellular fluids. Major substrate is lysophosphatidylcholine. Also can act on		
	sphingosylphosphphorylcholine producing sphingosine-1-phosphate, a modulator of cell		
	motility. Can hydrolyze, in vitro, bis-pNPP, to some extent pNP-TMP, and barely ATP. Involved in		
	several motility-related processes such as angiogenesis and neurite outgrowth. Acts as an		
	angiogenic factor by stimulating migration of smooth muscle cells and microtubule formation.		
	Stimulates migration of melanoma cells, probably via a pertussis toxin-sensitive G protein. May		
	have a role in induction of parturition. Possible involvement in cell proliferation and adipose		
	tissue development. Tumor cell motility-stimulating factor.
