	signaling seems to cooperate with SH2D1B/EAT-2. Initially it has been proposed that
	association with SLAMF1 prevents SLAMF1 binding to inhibitory effectors including
	INPP5D/SHIP1 and PTPN11/SHP-2 (PubMed:11806999). However, by simultaneous
	interactions, recruits FYN which subsequently phosphorylates and activates SLAMF1
	(PubMed:12458214). Positively regulates CD244/2B4- and CD84-mediated natural killer (NK)
	cell functions. Can also promote CD48-, SLAMF6 -, LY9-, and SLAMF7-mediated NK cell
	activation. In the context of NK cell-mediated cytotoxicity enhances conjugate formation with
	target cells (By similarity). May also regulate the activity of the neurotrophin receptors NTRK1,
	NTRK2 and NTRK3.
