

Datasheet for ABIN716975

anti-Acid Phosphatase antibody (AA 71-158) (HRP)

Overview

Overview	
Quantity:	100 μL
Target:	Acid Phosphatase (ACP)
Binding Specificity:	AA 71-158
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Acid Phosphatase antibody is conjugated to HRP
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)),
	Immunohistochemistry (Frozen Sections) (IHC (fro))
Product Details	
Immunogen:	KLH conjugated synthetic peptide derived from human Acid Phosphatase
Isotype:	IgG
Cross-Reactivity:	Mouse
Predicted Reactivity:	Human,Rat,Dog,Cow,Pig,Horse,Rabbit
Purification:	Purified by Protein A.
Target Details	
Target:	Acid Phosphatase (ACP)
Alternative Name:	Acid Phosphatase (ACP Products)

Target Details

Background:	Synonyms: Acid phosphatase 1 soluble, Acid phosphatase of erythrocyte, Adipocyte acid		
	phosphatase, Cytoplasmic phosphotyrosyl protein phosphatase, HAAP, Low molecular weight		
	phosphotyrosine protein phosphatase, PAP1, PAP2, Protein tyrosine phosphatase, PTPase,		
	Purple acid phosphatase, Red cell acid phosphatase 1, PPAC_HUMAN.		
	Background: Phosphatase enzymes catalyse hydrolysis of phosphoric acid esters of various		
	alcohols, e.g. a hexose phosphate, to yield the alcohol and free inorganic phosphate. This may		
	be a way of recycling phosphate in the cell, and the level of phosphate may be elevated under		
	conditions of phosphate starvation (in algae for example). Acid phosphatases have pH optima		
	below 7, whereas alkaline phosphatases are most active above pH 7. Commercial quantities of		
	acid phosphatase are obtained from plant sources e.g. potato and wheat germ, whereas similar		
	quantities of alkaline phosphatase are obtained from animal intestine and bacteria.		
Gene ID:	5068		
Application Details			
Application Notes:	WB 1:300-5000		
	IHC-P 1:200-400		
	IHC-F 1:100-500		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Concentration:	1 μg/μL		
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and		
	50 % Glycerol.		
Preservative:	ProClin		
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be		
	handled by trained staff only.		
Handling Advice:	Do NOT add Sodium Azide! Use of Sodium Azide will inhibit enzyme activity of horseradish		
	peroxidase.		
Storage:	-20 °C		
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
