Quantity:	100 μg
Target:	TOR1A
Binding Specificity:	AA 88-125
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This TOR1A antibody is conjugated to FITC
Application:	Please inquire

Product Details

Immunogen:	Recombinant Human Torsin-1A protein (88-125AA)	
Isotype:	IgG	
Cross-Reactivity:	Human	
Purification:	>95%, Protein G purified	

Target Details

Target:	TOR1A
Alternative Name:	TOR1A (TOR1A Products)
Background:	Background: Protein with chaperone functions important for the control of protein folding,
	processing, stability and localization as well as for the reduction of misfolded protein

aggregates. Involved in the regulation of synaptic vesicle recycling, controls STON2 protein stability in collaboration with the COP9 signalosome complex (CSN). In the nucleus, may link the cytoskeleton with the nuclear envelope, this mechanism seems to be crucial for the control of nuclear polarity, cell movement and, specifically in neurons, nuclear envelope integrity. Participates in the cellular trafficking and may regulate the subcellular location of multipass membrane proteins such as the dopamine transporter SLC6A3, leading to the modulation of dopamine neurotransmission. In the endoplasmic reticulum, plays a role in the quality control of protein folding by increasing clearance of misfolded proteins such as SGCE variants or holding them in an intermediate state for proper refolding. May have a redundant function with TOR1B in non-neural tissues.
