### **Target Details**

Target:	ZRSR2
Alternative Name:	ZRSR2 (ZRSR2 Products)
Background:	Background: Pre-mRNA-binding protein required for splicing of both U2- and U12-type introns.

Selectively interacts with the 3\'-splice site of U2- and U12-type pre-mRNAs and promotes different steps in U2 and U12 intron splicing. Recruited to U12 pre-mRNAs in an ATP-dependent manner and is required for assembly of the prespliceosome, a precursor to other spliceosomal complexes. For U2-type introns, it is selectively and specifically required for the second step of splicing.
