| Quantity:            | 100 µg                                     |
|----------------------|--|
| Target:              | RPS27A                                     |
| Binding Specificity: | AA 16-56                                   |
| Reactivity:          | Human                                      |
| Host:                | Rabbit                                     |
| Clonality:           | Polyclonal                                 |
| Conjugate:           | This RPS27A antibody is conjugated to FITC |
| Application:         | Please inquire                             |

## Product Details

| Immunogen:        | Recombinant Human Ubiquitin-40S ribosomal protein S27a protein (16-56AA) |  |
|-------------------|--|--|
| Isotype:          | lgG  |  |
| Cross-Reactivity: | Human  |  |
| Purification:     | >95%, Protein G purified   |  |

## Target Details

| Target:           | RPS27A  |  |
|-------------------|---|--|
| Alternative Name: | RPS27A (RPS27A Products)  |  |
| Background:       | Background: Ubiquitin: Exists either covalently attached to another protein, or free            |  |
|                   | (unanchored). When covalently bound, it is conjugated to target proteins via an isopeptide bond |  |

| either as a monomer (monoubiquitin), a polymer linked via different Lys residues of the            |
|--|
| ubiquitin (polyubiquitin chains) or a linear polymer linked via the initiator Met of the ubiquitin |
| (linear polyubiquitin chains). Polyubiquitin chains, when attached to a target protein, have       |
| different functions depending on the Lys residue of the ubiquitin that is linked: Lys-6-linked may |
| be involved in DNA repair, Lys-11-linked is involved in ERAD (endoplasmic reticulum-associated     |
| degradation) and in cell-cycle regulation, Lys-29-linked is involved in lysosomal degradation,     |
| Lys-33-linked is involved in kinase modification, Lys-48-linked is involved in protein degradation |
| via the proteasome, Lys-63-linked is involved in endocytosis, DNA-damage responses as well as      |
| in signaling processes leading to activation of the transcription factor NF-kappa-B. Linear        |
| polymer chains formed via attachment by the initiator Met lead to cell signaling. Ubiquitin is     |
| usually conjugated to Lys residues of target proteins, however, in rare cases, conjugation to Cys  |
| or Ser residues has been observed. When polyubiquitin is free (unanchored-polyubiquitin), it       |
| also has distinct roles, such as in activation of protein kinases, and in signaling.               |
| Aliases: RPS27A antibody, UBA80 antibody, UBCEP1 antibody, Ubiquitin-40S ribosomal protein         |
| S27a antibody, Ubiquitin carboxyl extension protein 80) [Cleaved into: Ubiquitin, 40S ribosomal    |
| protein S27a antibody, Small ribosomal subunit protein eS31)] antibody                             |
| P62979   |
|  |

| UniProt:  | P62979  |
|-----------|---|
| Pathways: | Fc-epsilon Receptor Signaling Pathway, EGFR Signaling Pathway, Neurotrophin Signaling   |
|           | Pathway, Activation of Innate immune Response, Mitotic G1-G1/S Phases, DNA Replication, |
|           | Toll-Like Receptors Cascades, Synthesis of DNA, EGFR Downregulation                     |

## Application Details

| Restrictions:      | For Research Use only   |
|--------------------|---|
| Handling           |   |
| Format:            | Liquid  |
| Buffer:            | Preservative: 0.03 % Proclin 300<br>Constituents: 50 % Glycerol, 0.01M PBS, pH 7.4                                |
| Preservative:      | ProClin   |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C,-80 °C   |
