Target Details

Target:	UBASH3A
Alternative Name:	UBASH3A (UBASH3A Products)
Background:	Background: Interferes with CBL-mediated down-regulation and degradation of receptor-type

Target Details

tyrosine kinases. Promotes accumulation of activated target receptors, such as T-cell receptors, EGFR and PDGFRB, on the cell surface. Exhibits negligible protein tyrosine phosphatase activity at neutral pH. May act as a dominant-negative regulator of UBASH3B-dependent dephosphorylation. May inhibit dynamin-dependent endocytic pathways by functionally sequestering dynamin via its SH3 domain.
