Datasheet for ABIN7174952

**anti-MYO1G antibody (AA 209-389) (HRP)**

## Overview

Quantity:	100 µg
Target:	MYO1G
Binding Specificity:	AA 209-389
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This MYO1G antibody is conjugated to HRP
Application:	ELISA

## Product Details

Immunogen:	Recombinant Human Unconventional myosin-Ig protein (209-389AA)
Isotype:	IgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

## Target Details

Target:	MYO1G
Alternative Name:	MYO1G ( <a href="#">MYO1G Products</a> )
Background:	Background: Unconventional myosin required during immune response for detection of rare antigen-presenting cells by regulating T-cell migration. Unconventional myosins are actin-based

## Target Details

motor molecules with ATPase activity and serve in intracellular movements. Acts as a regulator of T-cell migration by generating membrane tension, enforcing cell-intrinsic meandering search, thereby enhancing detection of rare antigens during lymph-node surveillance, enabling pathogen eradication. Also required in B-cells, where it regulates different membrane/cytoskeleton-dependent processes. Involved in Fc-gamma receptor (Fc-gamma-R) phagocytosis.

Aliases: mHag HA-2 antibody, Minor histocompatibility antigen HA-2 antibody, Myo1g antibody, MYO1G\_HUMAN antibody, myosin IG antibody

UniProt: [B0I1T2](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Liquid

Buffer: Preservative: 0.03 % Proclin 300  
Constituents: 50 % Glycerol, 0.01M PBS, PH 7.4

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C,-80 °C

Storage Comment: Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
