Quantity:	100 μg
Target:	VPS29
Binding Specificity:	AA 68-145
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This VPS29 antibody is conjugated to HRP
Application:	ELISA

Product Details

Immunogen:	Recombinant Human Vacuolar protein sorting-associated protein 29 protein (68-145AA)
Isotype:	IgG
Cross-Reactivity:	Human
Purification:	>95%, Protein G purified

Target Details

Target:	VPS29
Alternative Name:	VPS29 (VPS29 Products)
Background:	Background: Acts as component of the retromer cargo-selective complex (CSC). The CSC is
	believed to be the core functional component of retromer or respective retromer complex

variants acting to prevent missorting of selected transmembrane cargo proteins into the lysosomal degradation pathway. The recruitment of the CSC to the endosomal membrane involves RAB7A and SNX3. The SNX-BAR retromer mediates retrograde transport of cargo proteins from endosomes to the trans-Golgi network (TGN) and is involved in endosome-to-plasma membrane transport for cargo protein recycling. The SNX3-retromer mediates the retrograde endosome-to-TGN transport of WLS distinct from the SNX-BAR retromer pathway. The SNX27-retromer is believed to be involved in endosome-to-plasma membrane trafficking and recycling of a broad spectrum of cargo proteins. The CSC seems to act as recruitment hub for other proteins, such as the WASH complex and TBC1D5. Required to regulate transcytosis of the polymeric immunoglobulin receptor (plgR-plgA) (Probable). Involved in GLUT1 endosome-to-plasma membrane trafficking, the function is dependent of association with ANKRD27 (PubMed:24856514).
