| Target:              | HSPA1B                                    |
| Binding Specificity: | AA 2-642                                  |
| Reactivity:          | Mouse                                     |
| Host:                | Rabbit                                    |
| Clonality:           | Polyclonal                                |
| Conjugate:           | This HSPA1B antibody is conjugated to HRP |
| Application:         | ELISA                                     |

## **Product Details**

| Immunogen:        | Recombinant Mouse Heat shock 70 kDa protein 1B protein (2-642AA) |  |

well as within organelles. These chaperones participate in all these processes through their ability to recognize nonnative conformations of other proteins. They bind extended peptide segments with a net hydrophobic character exposed by polypeptides during translation and membrane translocation, or following stress-induced damage. Essential for STUB1-mediated ubiquitination and degradation of FOXP3 in regulatory T-cells (Treg) during inflammation.
