**anti-RYBP antibody (AA 1-389) (HRP)**[Go to Product page](#)

## Overview

|                      |                                         |
|----------------------|-----------------------------------------|
| Quantity:            | 100 µg                                  |
| Target:              | RYBP                                    |
| Binding Specificity: | AA 1-389                                |
| Reactivity:          | Saccharomyces cerevisiae                |
| Host:                | Rabbit                                  |
| Clonality:           | Polyclonal                              |
| Conjugate:           | This RYBP antibody is conjugated to HRP |
| Application:         | ELISA                                   |

## Product Details

|                   |                                                                                        |
|-------------------|----------------------------------------------------------------------------------------|
| Immunogen:        | Recombinant Saccharomyces cerevisiae Alanine/arginine aminopeptidase protein (1-389AA) |
| Isotype:          | IgG                                                                                    |
| Cross-Reactivity: | Saccharomyces cerevisiae                                                               |
| Purification:     | >95%, Protein G purified                                                               |

## Target Details

|                   |                                                                                                                                                                                      |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | RYBP                                                                                                                                                                                 |
| Alternative Name: | AAP1 ( <a href="#">RYBP Products</a> )                                                                                                                                               |
| Background:       | Background: Positive effector of glycogen accumulation. May be involved in nutrient-sensing.<br>Aliases: AAP1 antibody, YHR047CAlanine/arginine aminopeptidase antibody, EC 3.4.11.- |

## Target Details

antibody

UniProt: [P37898](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Liquid

Buffer: Preservative: 0.03 % Proclin 300  
Constituents: 50 % Glycerol, 0.01M PBS, PH 7.4

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C,-80 °C

Storage Comment: Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
