Target Details

Target:	ADA
Alternative Name:	Adenosine deaminase (ADA Products)

Target Details

Background:	Synonyms: Adenosine deaminase, Adenosine aminohydrolase, ADA, ADA1 Background: Catalyzes the hydrolytic deamination of adenosine and 2-deoxyadenosine. Plays an important role in purine metabolism and in adenosine homeostasis. Modulates signaling by extracellular adenosine, and so contributes indirectly to cellular signaling events. Acts as a positive regulator of T-cell coactivation, by binding DPP4. Its interaction with DPP4 regulates lymphocyte-epithelial cell adhesion.
