## Datasheet for ABIN7195537 EPH Receptor A7 Protein (EPHA7) (His tag)

1 Image

Overview

| Quantity:                     | 200 µg   |
|-------------------------------|--|
| Target:                       | EPH Receptor A7 (EPHA7)                                |
| Origin:                       | Mouse  |
| Source:                       | HEK-293 Cells  |
| Protein Type:                 | Recombinant  |
| Biological Activity:          | Active   |
| Purification tag / Conjugate: | This EPH Receptor A7 protein is labelled with His tag. |

## Product Details

| Purpose:                     | Recombinant Mouse EphA7/EHK3 Protein (His Tag)(Active)  |
|------------------------------|---|
| Sequence:                    | Met 1-Ile 556   |
| Characteristics:             | A DNA sequence encoding the mouse EPHA7 isoform 1 (Q61772-1) extracellular domain (Met 1-IIe 556) was fused with a polyhistidine tag at the C-terminus.                         |
| Purity:                      | > 97 % as determined by SDS-PAGE  |
| Endotoxin Level:             | < 1.0 EU per $\mu$ g of the protein as determined by the LAL method.  |
| Biological Activity Comment: | Measured by its binding ability in a functional ELISA. Immobilized mouse EphA7 at 2 $\mu$ g/ml (100 $\mu$ l/well) can bind mouse EphrinA4 with a linear range of 0.08-10 ng/ml. |

## **Target Details**

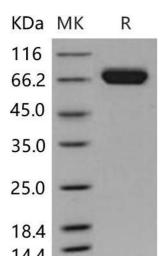

Target:

EPH Receptor A7 (EPHA7)

| Target Details      |  |  |  |
|---------------------|--|--|--|
| Alternative Name:   | EphA7/EHK3 (EPHA7 Products)  |  |  |
| Background:         | Background: Ephrin type-A receptor 7, also known as EphA7, belongs to the ephrin receptor  |  |  |
|                     | subfamily of the protein-tyrosine kinase family which 16 known receptors (14 found in  |  |  |
|                     | mammals) are involved: EPHA1, EPHA2, EPHA3, EPHA4, EPHA5, EPHA6, EPHA7, EPHA8,   |  |  |
|                     | EPHA9, EPHA10, EPHB1, EPHB2, EPHB3, EPHB4, EPHB5, EPHB6. The Eph family of receptor  |  |  |
|                     | tyrosine kinases (comprising EphA and EphB receptors) has been implicated in synapse   |  |  |
|                     | formation and the regulation of synaptic function and plasticity6. Eph receptor-mediated   |  |  |
|                     | signaling, which is triggered by ephrins7, probably modifies the properties of synapses during   |  |  |
|                     | synaptic activation and remodeling. Ephrin receptors are components of cell signalling   |  |  |
|                     | pathways involved in animal growth and development, forming the largest sub-family of  |  |  |
|                     | receptor tyrosine kinases (RTKs). Ligand-mediated activation of Ephs induce various important  |  |  |
|                     | downstream effects and Eph receptors have been studied for their potential roles in the  |  |  |
|                     | development of cancer. Down-regulation of EphA7 secondary to hypermethylation has been   |  |  |
|                     | reported in colorectal cancer. The expression of EphA7 was reduced in all tested gastric cancer  |  |  |
|                     | cell lines, however, there is marked variability in expression among gastric carcinoma   |  |  |
|                     | specimens. EphA7 may have roles in the pathogenesis and development of gastric carcinomas  |  |  |
|                     | Synonym: Cek11,Ebk,Ehk3,Hek11,Mdk1,RP23-33D17.1  |  |  |
| Molecular Weight:   | 60.4 kDa   |  |  |
| Pathways:           | RTK Signaling  |  |  |
| Application Details |  |  |  |
| Restrictions:       | For Research Use only  |  |  |
| Handling            |  |  |  |
| Format:             | Lyophilized  |  |  |
| Reconstitution:     | Please refer to the printed manual for detailed information.   |  |  |
| Buffer:             | Lyophilized from sterile PBS, pH 7.4   |  |  |
| Storage:            | 4 °C,-20 °C,-80 °C   |  |  |
| Storage Comment:    | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C.<br>Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. |  |  |
