Datasheet for ABIN7195671 FCER2 Protein (Fc Tag)

Image

Overview

Quantity:	100 µg
Target:	FCER2
Origin:	Rat
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This FCER2 protein is labelled with Fc Tag.

Product Details

Purpose:	Recombinant Rat CD23 Protein (Fc Tag)
Sequence:	Glu50-Pro331
Characteristics:	A DNA sequence encoding the rat FCER2 (Q6AZ45) (Glu50-Pro331) was expressed with Fc region of human IgG1 at the N-terminus.
Purity:	> 90 % as determined by SDS-PAGE
Endotoxin Level:	< 1.0 EU per μ g of the protein as determined by the LAL method

Target Details

Target:	FCER2
Alternative Name:	CD23 (FCER2 Products)
Background:	Background: Fc fragment of IgE, low affinity II, receptor for (CD23) or CD23 antigen is a member of the cluster of differentiation family. The cluster of differentiation (cluster of
	designation) (often abbreviated as CD) is a protocol used for the identification and investigation

	of cell surface molecules present on white blood cells initially but found in almost any kind of
	cell of the body, providing targets for immunophenotyping of cells. Physiologically, CD
	molecules can act in numerous ways, often acting as receptors or ligands (the molecule that
	activates a receptor) important to the cell. A signal cascade is usually initiated, altering the
	behavior of the cell (see cell signaling). Some CD proteins do not play a role in cell signaling, but
	have other functions, such as cell adhesion. CD23/FCER2 is a B-cell specific antigen, and a low-
	affinity receptor for IgE. It has essential roles in B cell growth and differentiation, and the
	regulation of IgE production. This protein also exists as a soluble secreted form, then
	functioning as a potent mitogenic growth factor. Increased levels of soluble CD23/FCER2
	cause the recruitment of non-sensitised B-cells in the presentation of antigen peptides to
	allergen-specific B-cells, therefore increasing the production of allergen specific IgE. IgE, in turn,
	is known to upregulate the cellular expression of CD23 and Fc epsilon RI (high-affinity IgE
	receptor).
	Synonym: FCER2,Fcer2a
r Weight:	60.2 kDa
	Q6AZ45

Pathways:

UniProt:

Molecular

Regulation of Leukocyte Mediated Immunity, Positive Regulation of Immune Effector Process

Application Details

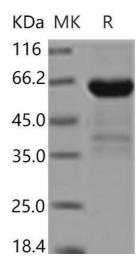

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Reconstitution:	Please refer to the printed manual for detailed information.	
Buffer:	Lyophilized from sterile PBS, PH 7.4	
Storage:	4 °C,-20 °C,-80 °C	
Storage Comment:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C.	
	Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted	
	samples are stable at < -20°C for 3 months.
