Datasheet for ABIN7198628 **AKT1 Protein (His tag)**

Overview

Quantity:	50 µg
Target:	AKT1
Origin:	Human
Source:	Baculovirus infected Insect Cells
Protein Type:	Recombinant
Biological Activity:	Active
Purification tag / Conjugate:	This AKT1 protein is labelled with His tag.

Product Details

Purpose:	Recombinant Human AKT1/PKB/PKBα Protein (His Tag)(Active)
Sequence:	Met 1-Ala 480
Characteristics:	A DNA sequence encoding the human AKT1 (NP_001014431.1) (Met 1-Ala 480) was fused with a polyhistidine tag at the C-terminus.
Purity:	> 87 % as determined by reducing SDS-PAGE.
Endotoxin Level:	< 1.0 EU per µg as determined by the LAL method.
Biological Activity Comment:	1.No Kinase Activity 2. Measured by its ability to bind biotinylated human CD136 in a functional ELISA.

Target Details

Target:	AKT1
---------	------

Target Details

Alternative Name: [AKT1/PKB/PKBalpha \(AKT1 Products\)](#)

Background: Background: v-akt murine thymoma viral oncogene homolog 1 (AKT1), or protein kinase B-alpha (PKB-ALPHA) is a serine-threonine protein kinase, belonging to the Protein Kinase Superfamily. AKT1 is a major mediator of the responses to insulin, insulin-like growth factor 1 (IGF1), and glucose. AKT1 also plays a key role in the regulation of both muscle cell hypertrophy and atrophy. AKT1 activity is required for physiologic cardiac growth in response to IGF1 stimulation or exercise training. In contrast, AKT1 activity was found to antagonize pathologic cardiac growth that occurs in response to endothelin 1 stimulation or pressure overload. AKT1 selectively promotes physiological cardiac growth while AKT2 selectively promotes insulin-stimulated cardiac glucose metabolism. AKT1 deletion prevented tumor initiation as well as tumor progression, coincident with decreased Akt signaling in tumor tissues. AKT1 is the primary Akt isoform activated by mutant K-ras in lung tumors, and that AKT3 may oppose AKT1 in lung tumorigenesis and lung tumor progression. A number of separate studies have implicated AKT1 as an inhibitor of breast epithelial cell motility and invasion. AKT1 may have a dual role in tumorigenesis, acting not only pro-oncogenically by suppressing apoptosis but also anti-oncogenically by suppressing invasion and metastasis. Immune Checkpoint Immunotherapy Cancer Immunotherapy Targeted Therapy

Synonym: AKT;CWS6;PKB;PKB-ALPHA;PRKBA;RAC;RAC-ALPHA

Molecular Weight: 57 kDa

NCBI Accession: [NP_001014431](#)

Application Details

Restrictions: For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	Please refer to the printed manual for detailed information.
Buffer:	Lyophilized from sterile 50 mM Tris, 100 mM NaCl, 3 mM DTT, 0.5 mM PMSF, 5 % Glycerol, pH 8.0
Storage:	4 °C,-20 °C,-80 °C
Storage Comment:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
