

Datasheet for ABIN7200657 Recombinant anti-VEGF (Ranibizumab Biosimilar) antibody

Overview

Overview		
Quantity:	2 mg	
Target:	VEGF (Ranibizumab Biosimilar)	
Reactivity:	Human	
Host:	Mouse	
Antibody Type:	Recombinant Antibody	
Clonality:	Monoclonal	
Conjugate:	This VEGF (Ranibizumab Biosimilar) antibody is un-conjugated	
Application:	Flow Cytometry (FACS), In vivo Studies (in vivo)	
Product Details		
Purpose:	Ranibizumab Biosimilar, Human VEGF Monoclonal Antibody Fragment (Fab)	
Purpose: Immunogen:	Ranibizumab Biosimilar, Human VEGF Monoclonal Antibody Fragment (Fab)The research grade Fab protein ranibizumab was produced in the ranibizumab biosimilar E.colicell line.	
·	The research grade Fab protein ranibizumab was produced in the ranibizumab biosimilar E.coli	
Immunogen:	The research grade Fab protein ranibizumab was produced in the ranibizumab biosimilar E.coli cell line.	
Immunogen: Fragment:	The research grade Fab protein ranibizumab was produced in the ranibizumab biosimilar E.coli cell line. Fab fragment	
Immunogen: Fragment: Specificity:	 The research grade Fab protein ranibizumab was produced in the ranibizumab biosimilar E.coli cell line. Fab fragment The Fab protein ranibizumab specifically binds to the human VEGF-A. Recombinant Humanized Monoclonal Antibody Fragment (Fab) generated from the same

Product Details

Endotoxin Level:

< 1 EU per 1 mg of the protein by the LAL method.

Target Details

Target:	VEGF (Ranibizumab Biosimilar)	
Abstract:	VEGF (Ranibizumab Biosimilar) Products	
Target Type:	Biosimilar	
Background:	The humanized anti-VEGF-A monoclonal antibody drug Bevacizumab (trade name Avastin,	
	Genentech/Roche) is the first clinically available angiogenesis inhibitor in the United States. The	
	humanized anti-VEGF-A monoclonal antibody fragment (Fab) Ranibizumab (trade name	
	Lucentis, Genentech) is derived from the same parent mouse antibody as bevacizumab. Both	
	antibody drugs produce angiogenesis inhibition and slow the growth of new blood vessels.	
	Ranibizumab is much smaller than the parent complete antibody but shows stronger binding to	
	VEGF-A after affinity maturation. Ranibizumab can also be used to treat the "wet" type of age-	
	related macular degeneration (AMD, also ARMD), a common form of age-related vision loss.	

Vascular endothelial growth factor A (VEGF-A) stimulates angiogenesis in a variety of cancers, including colorectal, lung, breast, glioblastoma, kidney, and ovarian cancers.

Application Details

Application Notes:	Functional assay, neutralization.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Concentration:	1 mg/mL	
Buffer:	PBS, pH 7.4, no stabilizers or preservatives.	
Preservative:	Without preservative	
Handling Advice:	Use a manual defrost freezer and avoid repeated freeze-thaw cycles.	
Storage:	-20 °C	
Storage Comment:	12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied.
