Target Details

Alternative Name:	UBAP1 (UBAP1 Products)
Background:	<p>Synonyms: MGC8710, NAG20, Nasopharyngeal carcinoma associated gene 20 protein, UAP, UBAP, Ubiquitin associated protein 1, UBAP1_HUMAN.</p> <p>Background: This gene is a member of the UBA domain family, whose members include proteins having connections to ubiquitin and the ubiquitination pathway. The ubiquitin associated domain is thought to be a non-covalent ubiquitin binding domain consisting of a compact three helix bundle. This particular protein originates from a gene locus in a refined region on chromosome 9 undergoing loss of heterozygosity in nasopharyngeal carcinoma (NPC). Taking into account its cytogenetic location, this UBA domain family member is being studied as a putative target for mutation in nasopharyngeal carcinomas. Multiple alternatively spliced transcript variants encoding different isoforms have been found for this gene.</p>
