Target Details

Alternative Name:	Neurofibromin (NF1 Products)
Background:	Rabbit Anti-Neurofibromin Polyclonal Antibody, NF1, Neurofibromin, Neurofibromatosis-related protein NF-1, NF1 product appears to function as a negative regulator of the ras signal transduction pathway. Mutations in this gene have been linked to neurofibromatosis type 1, juvenile myelomonocytic leukemia and Watson syndrome. The mRNA for this gene is subject to RNA editing (CGA>UGA->Arg1306Term) resulting in premature translation termination. Alternatively spliced transcript variants encoding different isoforms have also been described for this gene., Neurofibromin
Molecular Weight:	observed band 319kDa
Gene ID:	4763
UniProt:	P21359
Pathways:	cAMP Metabolic Process , Regulation of long-term Neuronal Synaptic Plasticity

Application Details

Application Notes:	Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: WB (1:500-1:2000), IF (1:200-1:1000), ELISA (1:20000). Not yet tested in other applications.
