Background: Rabbit Anti-FLRT3 Polyclonal Antibody,Leucine-rich repeat transmembrane protein FLRT3	

Target Details	
	Fibronectin-like domain-containing leucine-rich transmembrane protein 3,FLRT3 encodes a member of the fibronectin leucine rich transmembrane protein (FLRT) family. FLRTs may function in cell adhesion and/or receptor signalling. Their protein structures resemble small leucine-rich proteoglycans found in the extracellular matrix. This gene is expressed in many tissues. Two alternatively spliced transcript variants encoding the same protein have been described for this gene.,FLRT3
