

## Datasheet for ABIN7232677 **anti-Galectin 9 antibody**

[Go to Product page](#)

### Overview

|              |                                           |
|--------------|-------------------------------------------|
| Quantity:    | 500 µL                                    |
| Target:      | Galectin 9 (LGALS9)                       |
| Reactivity:  | Human                                     |
| Host:        | Mouse                                     |
| Clonality:   | Monoclonal                                |
| Conjugate:   | This Galectin 9 antibody is un-conjugated |
| Application: | ELISA, Flow Cytometry (FACS)              |

### Product Details

|              |                                                                       |
|--------------|-----------------------------------------------------------------------|
| Purpose:     | Anti-Human Galectin-9 Monoclonal Antibody, Azide Free Clone B-T33     |
| Immunogen:   | Recombinant human Galectin-9, Myeloma X63/AG.8653 x Balb/c node cells |
| Clone:       | B-T33                                                                 |
| Isotype:     | IgG2b, kappa                                                          |
| Specificity: | Recognises both natural and recombinant human Galectin-9 protein      |

### Target Details

|                   |                                                |
|-------------------|------------------------------------------------|
| Target:           | Galectin 9 (LGALS9)                            |
| Alternative Name: | Galectin-9 ( <a href="#">LGALS9 Products</a> ) |
| Background:       | Ecalectin / HUAT / LGALS9                      |

Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
| Restrictions:      | For Research Use only                                              |

Handling

|                  |                                                                                            |
|------------------|--------------------------------------------------------------------------------------------|
| Buffer:          | Phosphate-buffered saline. Sterile-filtered through 0.22 µm. Carrier and preservative free |
| Preservative:    | Without preservative                                                                       |
| Storage:         | 4 °C                                                                                       |
| Storage Comment: | Stable at +2-8°C for 12 months. For longer storage freeze aliquots.                        |
